Arts and Design Degree
Universität der Künste, Berlin
Erasmus Year
Ubiqum Code Academy, Barcelona
Java, Web & Mobile Developer
Coursera
Generative AI, LLMs & AI Agents

Hobbies

Cinema · TV Series · Comics
Videogames · Football
Japan · Travelling

About

Senior Front-End Developer and UX/UI Designer with over 10 years of experience taking web products from **Figma to production**. I work at the intersection of design, product and engineering, building fast, accessible interfaces with **Vue.js and TypeScript**.

Currently at Your New Self (Multiestetica), where I also drive **SEO, SEM and analytics** work to improve performance and conversion. I use **AI tools and agent-based workflows** (Claude Code) in my daily development and product work.

Work

Senior Front-End Developer

Your New Self (Multiestetica) | Barcelona | June 2025 – Present

- Design and build user-facing features across a multi-project Vue.js / TypeScript monorepo for Multiestetica, a leading aesthetics and beauty platform.
- Improved **Core Web Vitals and search rankings by over 20%** in the last year through performance and SEO work.
- Own the UX/UI process end to end: designs and prototypes in Figma turned into production-ready components.
- Work with the product team using AI tools (Claude Code) to define, refine and ship new features on the website.
- Drive SEO and SEM work focused on conversion (landing pages, campaign microsites) and measure it with Google Analytics 4 and Google Tag Manager.
- Led a TypeScript migration and code unification effort, creating a centralized rendering system that removed duplicated code across projects.
- Integrate the front end with the Symfony back end through Twig templates, and query databases to validate incoming data.

AI & Development Training

Coursera | December 2024 – May 2025

- Courses on generative AI, LLMs, agentic AI, RAG and MCP, plus two specialized courses on front-end development with AI agents.

Front-End Developer & UX/UI Designer

Larcier-Intersentia | Barcelona / Luxembourg | July 2019 – December 2024

- Built responsive websites and applications in close collaboration with product and design teams.
- Developed reusable, high-performance front-end components with HTML, CSS, JavaScript and Vue.js.
- Led the design process with wireframes, prototypes and user flows, with a strong focus on UX and accessibility.
- Ran usability tests and A/B tests to refine designs and improve product usability.

Front-End Developer

3D Tech Omega Zeta | Barcelona | August 2017 – June 2019

- Turned UX wireframes and mockups into responsive, interactive features with HTML, CSS and JavaScript.

Web & Graphic Designer

Freelance | Barcelona | January 2009 – August 2017

- Designed and built custom WordPress websites, optimized for performance and SEO.
- Created brand identities, web designs and print materials for clients across diverse industries.

Projects github.com/franziskus16

Pet Meal Planner · Nuxt 4, Vue 3, TypeScript, Pinia

- Multi-step form with a persistent A/B test, GTM-ready analytics and hexagonal architecture; Vitest and Playwright tests in CI. Live demo

Loopi · React 19, TypeScript, React Router, Tailwind

- Online shop with search, filters and a cart built with Context and useReducer; tested with Vitest and React Testing Library. Live demo

Airports Explorer · Angular 22, NgRx, TypeScript

- App with login, route guards, an HTTP interceptor and NgRx state, built with signals; Vitest tests and GitHub Actions. Live demo
